Objective

Skilled Software Engineer specialized in ReactJS, Node.js, UI creation, API integration. Seeking a challenging position to develop innovative software solutions, optimize user experiences and collaborate effectively with cross-functional teams.

Education

National Institute of Technology, Jalandhar — **2019 - 2023**
*Civil Engineering(Major) CGPA: **8.09**, B.Tech in CSE(Minor) CGPA: **8.0*** — *Jalandhar, Punjab*

St Johns Sr. Sec. School — **2018**
XII (CBSE): 90.6/100 — *Meerut, UP*

Work Experience

SWE Intern, Incture Technology *01/2023 - Present* — **Chandigarh**
- **Tech Used:** HTML, CSS, Javascript, ReactJS, SAP UI5, SAP CPI, XML, MVC Architecture
- Worked within the domain of enterprise software development and digital transformation, dually aligned with the SAP UI5 framework and SAP Cloud Platform Integration
- Developed custom applications and implemented user interfaces using the SAPUI5 framework following MVC architecture to ensure separations and maintainability of the applications.

Projects

Expense Tracker | *HTML, CSS, Javascript, ReactJS*
- Created an expense tracker app using ReactJS library, featuring a filter for viewing expenses by year and an interactive chart that displays monthly spending data.
- It allows users to add new expenses and gain valuable insights into their spending habits through the app's dynamic chart.

Food Order App | *HTML, CSS, Javascript, ReactJS, Redux.js*
- Developed a React-based food order app with an intuitive interface that allows users to add any number of items to their cart and automatically calculates their expenses using a dialog box.
- Implemented a feature that enables users to reduce the total number of items in their cart and displays live updates of their expenses.

Banking App User Interface | *HTML, CSS, Javascript*
- Developed a Bakist user interface for online banking using HTML, CSS and vanilla JavaScript, featuring money transfer, loan request and account deletion functionality.
- Implemented dynamic live transaction views, sorting feature and dynamic total balance display after each addition or deduction.

Skills

Programming Languages : C++, Javascript, Typescript, HTML, CSS, XML
Database Languages : MySQL, MongoDB
Libraries & Frameworks :ReactJS, NodeJS, React Native, Redux.js, Redux Saga, Express.js, Bootstrap, Tailwind CSS, Agile Methodologies, Material UI, Next.js, SAP UI5, SAP CPI
Technologies: GIT, Github, OOPS, DBMS, Data Structures and Algorithm
Soft Skills: Problem Solving, Leadership, Adaptablity

Achievements

- Solved 300+ Problems on Leetcode, GFG.
- Successfully organised Utkarsh, annual cultural fest of the institute
